GG Server for XP ?

Posted by Ottop - 2005/03/23 14:14

I don't know if I understood well, but the GG Servers has to be NT 4.0, Windows 2000 or Windows 2003.
Is it not possible to have a Windows XP as server of applications ? Why ? They are all based on the same NT kernel.

Using Windows XP as a server platform is under development and will be released later this year in version 3.1. Stay tuned.
