
Minimum requirements for Red Hat 8 and GG

Posted by Erik - 2004/02/18 19:05

Q: Are there any conditions for GO-Global to work under Red Hat 8?

A: Under Red Hat 8 you need a minimum of certain library versions for GO-Global to work.

Run the 'rpm' command to view the current version levels:

```
# rpm -qa | grep glibc
```

Verify the following libraries:

```
glib2-devel-2.0.6-2  
glib-1.2.10-8  
glibc-2.3.2-4.80.6
```
