
Why is Pricing Such a Big Secret

There is no pricing information available anywhere on your website. Why do you keep it such a secret?

Pricing is not a secret but since we sell both direct and through resellers, the pricelist will differ. Having prospective customers request pricing gives them a more accurate price and validates the opportunity to our sales team. Pricing can be obtained by sending an e-mail to sales@graphon.com. Trust me, you'll get a quick reply. ;-)

I'm trying to reach your office in the UK.

Could you help here as I'm about to decide what software solution we will take.
