
Shared sessions

Posted by bwhite - 2005/05/02 11:38

It would be nice if GO Global supported shared sessions, like VNC does. Then we could stop using VNC altogether. GO Global is so much faster than VNC.

Thanks for the suggestion. What specifically would you like to see? Full shared control of the KVM? Would the ability to "view" another session be sufficient?

Being able to view a session would go a long way. Full control would be a nice option though.

Session / Desktop Sharing like VNC

Posted by coldham - 2007/04/12 11:12

Greetings,

Will session /desktop sharing like VNC ever be implemented in Go Global? We strongly desire this feature.
