

# Solaris 9 Server Crashes on Startup

Posted by summersd619 - 2007/05/16 18:27

Getting this on a brand-new system (Solaris 9 64-bit, Generic\_122300-07 kernel). This is with GoGlobalUX version 2.2.4.929, just downloaded a few days ago. BTW, my AIX 5.3 & RHEL4-AMD64 machines work great:

```
(master) : master: using /opt/graphon as GOGLOBAL_ROOT
(master) : master: gold ready to start
(master) : master: redirecting stdout/stderr to log
(master) : master: getting test license for root@ucl-anakin
(master) : master: trying unix_session v2.2 for root@ucl-anakin with mgr 34d7e8
(master) : master: doing license for unix_session v2.2 for root@ucl-anakin
(master) : utility: Fatal signal: 11
