## client 2 rejected from IP 127.0.0.1

Posted by Scalius - 2007/08/09 06:05

---

Hello,

I'm using goGlobal 2.1 with Solaris 10.

The client is connecting using the windows version 2.1.4.

I'm able to connect ok to the server.

xTerm work fine.

My problem is when I try to start the graphical interface. (I have a link configured to use XDM direct query.) The XDM login is started fine.

The problem is that when I insert the login/password instead of loading the desktop environment it gets back to the login/password screen.

In the graphon session log i get the following lines different from other server that is working fine.

```
: AUDIT: Tue Aug 7 18:45:35 2007: 5576 Xgo: : client 2 rejected from IP 127.0.0.1 port 33826
: AUDIT: Tue Aug 7 18:45:35 2007: 5576 Xgo: : client 2 rejected from IP 127.0.0.1 port 33827
: AUDIT: Tue Aug 7 18:45:35 2007: 5576 Xgo: : client 2 rejected from IP 127.0.0.1 port 33828
: AUDIT: Tue Aug 7 18:45:35 2007: 5576 Xgo: : client 2 rejected from IP 127.0.0.1 port 33829
: AUDIT: Tue Aug 7 18:45:36 2007: 5576 Xgo: : client 2 rejected from IP 127.0.0.1 port 33830
```

If anyone can help I'll greatly appreciate.

Thank you.
