
Caps Lock Problem

Posted by dji - 2007/08/21 08:45

We have a customer using Go Global UX Server version 2.2.4.929 and the compatible unix client. They are seeing an issue where Toggling caps-lock on and off does not reliably result in the characters being reproduced according to the caps-lock indication LED on the keyboard.

Has anyone seen this and is there an available solution ?

Thanks in advance,

Dave
