## Changing Server & licence.lic

Posted by glsaavedra - 2007/07/26 06:32

---

Hi Forum

A client has bought a license of GoGlobal for Windows, has been installed in server "A".  
In two months we will proceed to change the server (server "B"), what steps must I perform to change the license parameters to work correctly in the server "B" ?

Thanks in advance

Guillermo

If server A still alive,you can point server B license to Server A.Ike as follow

-----  
SERVER ServerA 00110BBBC15DD  
USE\_SERVER  
-----

If Server A is not alive.you need rehost from <http://www.graphon.com/support/rehost.shtml>
