## Viewing Content

Posted by Ray - 2008/05/29 07:53

---

We have a office that coordinates with special education instructors throughtout the state. One of those instructors posted a video in Go Global and emailed the information to a user that is trying to view content. We have loaded the client software which asks for a IP address, but we don't know the IP address. How do we view the content? Thanks...
