Hi,

I'm from Brazil and I'm not understand english very well. Than, sorry about errors!

Well, I try to publish a 16 bit application at GoGlobal, but without sucess! This application is so important to be used in my job!

We use LTSP system on SUSE LINUX ENTERPRISE SERVER and Go-Global to publish Windows' applications.

How can't I publish this 16bit application?

Application name: SICALC

Tks, and sorry again! :)

Note: Ops! This topic isn't in the correct place! Change please!

Hello,

Unfortunately, GO-Global does not support 16-bit applications, only 32-bit.
