
Release notes for Go-Global 4.1?

Posted by Zoogoober - 2008/07/14 13:35

I am looking for the release notes for the newest version of Go-Global that is hosted on the GraphOn website. The current hyper link sends you to the 3.2 release notes. Any help would be awesome. Thanks

GO-Global 4 is not scheduled for release until next year. Once it is, you can generally find any release notes here or here and within the distribution itself. As of today, the most current release of GO-Global is 3.2.0 (build 4226).

My mistake, I looked at the version number of the setup file I downloaded from the website and it stated 4.1.100.1332. I assumed that was the version of the software by mistake. Thank you
