## Can I install GoGlobal server on a Virtual Server?

Posted by fabianch - 2008/08/13 04:11

---

As Win 2003 32 bits has a 4 gig ram limitation, I am wondering if I can setup Virtual Servers on my 16 gig ram server, and install 2003 with GoGlobal using 4 giga ram, then copy that VM machine 4 times with different IP addresses and end up having all the 16 gig ram used for GoGlobal. CAn GOGlobal run on Virtual Machine software? And if yes, is there any specific VM software I need to use (like VMWARE)?

fabianch, yes, GO-Global can run in a VM. We generally use VMware but others are known to work as well.

I'm currently testing it on MS Virtual Server 2005.
