## print problem

Posted by thierry - 2008/10/09 07:26

---

Hi ,  
i'm new here en also a brandnew users of goglobal .  
i make a short explanation of my problem.  
goglobal server in belgium , 3 clients in Tchèque , eveything gone be fine ,just one lite thing  
the first of the client that start his pc can print the 2 others not , how can that be  
thanks for help

Hello Thierry,

This may be a permission problem. Check the users profile for any limitations. Also, if the printer is shared, sometimes there are sharing limitations and only certain users can use this printer. Last, if the printers are not the same, there may be a problem with the print driver not getting used properly.
