## How do I transfer my license to a new host?

Posted by troym - 2003/10/15 19:49

---

If you are moving your license from one host to another, GraphOn requires that you complete a License Rehosting Form before our accounting department will issue the new license. The typical response time is within 24 hours. Our policy is that customers with a current maintenance contract may rehost their licenses up to 4 times per year. If you attempt to exceed 4 rehosts per year or you do not have a current maintenance contract, our Sales department will contact you regarding your options.

You can download the rehosting from: <http://www.graphon.com/support/rehost.pdf>

You can also complete the online rehosting form at: <http://www.graphon.com/support/rehost.shtml>

Because the submitted form must be signed, you will need to sign and fax the form to our accounting department.
