
Splash Screen

Posted by jprovan - 2004/05/18 23:07

I like you guys and everything, but I would like to dispense with the splash screen that has your name plastered all over it and replace it with my own...for my customers :)

Could you tell me how this might be done ?

GO-Global was designed to do just that but this functionality is considered part of our OEM "branding" kit that is available as a cost option. If you are interested in exploring this further, send an e-mail to sales@graphon.com.
