

## Java 1.5 and GoGlobal client on both Windows and UNIX

Posted by mstosick - 2004/12/01 22:18

---

I have GoGlobal UNIX 2.1.1 installed under Solaris 9 and have Java 1.4.2\_05. Due to SUN ALert 57591 Security Vulnerability With Java Plug-in in JRE/SDK I have to update to at least 1.4.2\_06 (corp mandate). I would like to go to 1.5 for all clients. Does GoGlobal work with Java 1.5 and IE 6 on Widnows adn firefox 1.0 on windows 2K SP4 and Windows XP SP1 and and/or SP2 ?

We have confirmed that the current Java client is not compatible with the 1.5 Java from Sun. We are investigating, and hope to have a fix for this in the next major release.

---

The message board says you are investigationg support for Java 1.5 and will hopefully be in the next major release.

Has this occured now and if so which version is it in?
