

Virtual Server error

Posted by - 2005/01/19 21:16

We often get a Virtual Server Memory requirement not met error message when people try to logon. We might have 3 people logged on to Goldmine and have no problem. Then the next day, it might refuse to let anyone on. There seems to be no rhyme or reason. We run only GoldMine and Go Global on this machine. It has 600+Mb space available and have 256 Mb Ram. I appreciate any help anyone can give.

256 MB RAM is not very much. I would suggest adding more.
