GraphOn Partners with ITMD to Market GO-Global in Australia

SANTA CRUZ, CA, USA – Feb. 18, 2008 – GraphOn Corporation (OTCBB: GOJO.OB), a leading worldwide developer of thin-client application publishing and Web-enabling solutions, announced today that it has signed a reseller agreement with Sydney, Australia-based IT Manager on Demand (ITMD) to market the GO-Global software family throughout the Australasian region.

“We believe that GO-Global will improve our market reach, extend the breadth of our offerings, and add value to our products and services,” said Sean Bloch, ITMD Managing Director. “GO-Global dramatically lowers the total costs of maintaining an effective network environment, while providing users with easy access to existing applications from remote locations.”

GO-Global is a fast, simple, and affordable application delivery solution that lets users run centralized Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for the Web or deploy complex infrastructure such as Microsoft Windows Terminal Server or Citrix Presentation Server.

“ITMD has grown at an impressive rate over the past decade,” said Tom Castanzo, GraphOn’s Business Development Director. “Their growth and market penetration have enabled the company to build a solid foundation of customers and market knowledge. We are pleased to announce this partnership agreement, and look forward to a successful relationship.”

“Our goal is to deliver GO-Global efficiently to existing and new customers, thereby demonstrating our commitment to world-class products and services,” concluded Bloch. “ITMD will provide comprehensive sales, marketing and support operations for GO-Global in the Australasian market. As a channel partner, ITMD is fully committed to teaming with GraphOn and taking GO-Global to an ever-developing market.”

About IT Manager on Demand

ITMD provides a complete range of IT products and services, including server installation, onsite support, remote helpdesk support, maintenance contracts, and monitoring of critical services in all major Australian cities. The company offers smaller organizations affordable solutions to business-critical services such as Microsoft Exchange email hosting and domain management.
